

Training:

Hacking 101

Date of the training: **March 18–19, 2019** in Heidelberg, Germany

Book Now using the voucher code: **TR19_HMTS** and save an additional 5% of the current valid rate of any package!

Overview

This two-day workshop gives an insight to a broad variety of hacking techniques. Experts from ERNW show you everything from basic principles up to common and more advanced tricks to break current security mechanisms. The subjects of this workshop will cover network security, low-level software exploitation, reverse engineering, web application hacking and more.

As an attendee, you will learn to think and act with the mindset of an attacker. Understanding their routine, tools, and procedures will enable you to gain a novel outside perspective onto your current setups and deployments. With this knowledge, you will find yourself capable of locating and addressing the most pressing threats faster and more efficiently.

This session is brought to you by seasoned experts from ERNW. With loads of experience in the field, penetration testing is said to be their favorite discipline in the world of IT security.

Requirements

- Bring your own Laptop with administrative privileges, including pre-installed VirtualBox (VMware Workstation or VMware Player should work, too). If your Laptop don't have an Ethernet port anymore, please bring also an USB Ethernet Adapter with you, if possible.
- Basic knowledge of networking and working with command lines (especially on Linux) is strongly recommended, but not required. Also, being familiar with a programming/scripting language is considered useful

About the Speaker: Sven Nobis

Sven Nobis works as a Security Analyst at ERNW performing application and infrastructure assessments. He is mainly focusing on web application security and cloud infrastructure security. Besides IT security, he is a passionate developer and trying to link his experiences to the everyday work.

About the Speaker: Julian Suleder

Julian Suleder is a Security Researcher and Penetration Tester at ERNW Research GmbH. His special research interest is the security of medical devices as he holds a master's degree in medical informatics from Heidelberg University and Heilbronn University. Besides his studies he worked as Academic Assistant at Heilbronn University and taught the concepts of the risk-driven approach for the specification of requirements for the reliability and information security of complex systems, as well as methods and techniques for safe design and safe development of software.

Besides IT security, he researches in the field of consumer health informatics and recently published his findings in the topics of technology adoption, motivational aspects of and privacy concerns on wearables in the German running community in one of the most relevant scientific journals of medical informatics.

Booking

Recommended Online Booking of Trainings Through:

Sign-Up Form <https://troopers.de/tickets/>

Voucher code: **TR19_HMTS**

Using this voucher code automatically gives you an additional 5% off the current valid price! You can register with this code up until March 11th, 2019 or until seats have run out.
